

Squirrel class home learning - Autumn 1

Marvellous Me...

COMPLETED BY ALL:

Draw a large outline of your body and then fill that outline with facts and photos all about you. Include as many things as you can and make your facts as interesting as possible. Include things like your favourite foods, hobbies, holidays. Also think about your family, whether you have a nickname or not, your pets and so on. Do you have a particular talent or peculiar fact that would amaze the class? Have a really good think!

We want this to be you very best effort so make sure these facts are written in complete sentences, correctly punctuated and written with the neatest handwriting so we can display them in the classroom. It should be no bigger than A3 and the outline should be neatly cut around so it is human body shape. Please bring your finished piece into school on **Monday 17th September.**

CHALLENGES

Make a spoon puppet of yourself.

Write a list of the people in your family and draw a picture of them too. Count up how many different relatives you have and how they are related to you.

Create a detailed piece of writing about your favourite hobby. Add lots of detail. What do you need? Where do you have to go? Are there any particular instructions? What do you like about it?

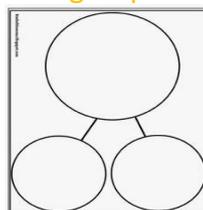

Think about your favourite 'healthy' foods. Can you design a menu that includes those foods and present it in a decorative way.

Write down as many number bonds for numbers up to 10 as you can. If you feel confident doing this, have a go at writing number bonds for numbers up to 20!

Useful vocabulary: Number bonds, part, whole, number balance, altogether, cubes, group

Ask your grown-ups about the toys they liked to play with when they were the same age as you. Remember to ask your parents and, if you can, your Grandparents. See if you can find a picture of that toy and write about the similarities and differences from toys you play with now.
